

Innovations in Window shades

About company

We take this opportunity to introduce ourselves as professionally managed company to all your needs for modern state of the art interiors and exteriors window shadings.

Foresight has officially partnered up with Grorich for special system & products to give better solution to customers

Way to Go:

Our sales consultants will visit your dream home and do preliminary survey, click some pictures and work on the various options to create a aesthetic and functional furnishing solution.

After which we will create a power point presentation with the apt solution and present it to you with the budgetary offer.

Insulated glass blinds :

Motorised Exterior & Interior Skylight

Honey comb Skylight :

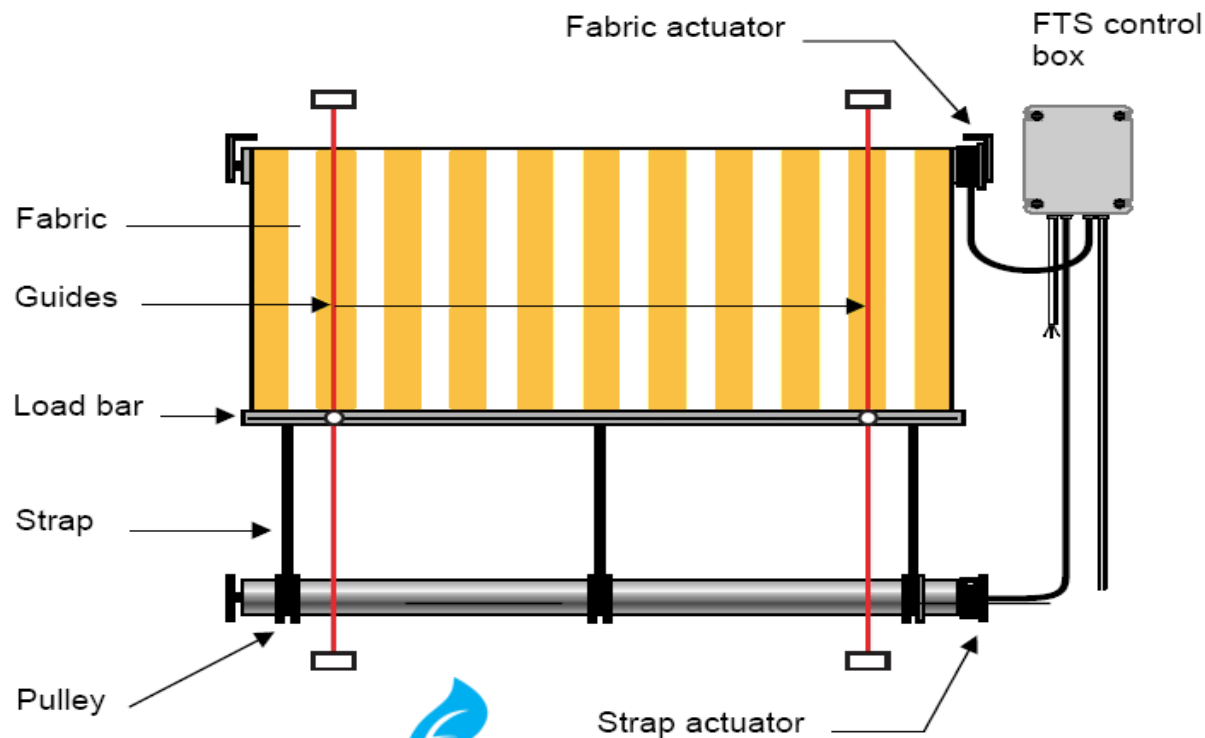

Velum roof and Skylight shadings :

Fabric Tension System (FTS) provides solutions for shading large areas, either horizontally or on a gradient. The FTS is an ideal solution for curved, horizontal or sloped glass panels and even vertical ones where the fabric needs to be constantly under tension. Applications include greenhouses, skylights, domes as well as beer gardens and terraces in restaurants, hotels and shopping centers

Exterior Motorised shades
