VNA FORKLIFT

About CTL15

The CTL15 is a 1.5T man-down **Very Narrow Aisle (VNA) truck**, designed for high-density storage applications. With a compact design and trilateral head , CTL15 maximizes warehouse space. With its multi-directional handling and lifting capabilities up to **13 meters**, CTL15 significantly increases operational productivity in VNA environments.

Application

- Narrow Aisle Warehouses: With the capacity to be operated in aisles as narrowas 1740 mm, CTL15 is ideal for tight spaces.
- Distribution Centers: Thanks to its 13-meter lift height, CTL15 is ideal for retrieving stored goods.
- Manufacturing Facilities: Ideal for handling palletized goods in tight spaces, ensuring smooth material flow in high-density storage areas.
- Multi-Level Racking Systems: Enables operators to access goods at high storage locations with ease and precision, ideal for facilities with tall racks.

Key Highlights

Space Maximization: CTL15 can be used in aisles as narrow as 1740 mm, maximizing warehouse storage with its trilateral head and 13-meter lifting capacity.

Precision Performance: Proportional lift system provides fine control over lifting and lowering operations, while guide wheels ensure smooth and accurate operation in tight spaces.

Maintenance- Free Lithium Battery: 48V/560Ah Li-ion battery offers extended runtime and opportunity charging capabilities.

Ergonomic Design: Side-seated configuration improved operator comfort and visibility, ensuring safety and productivity.
